Subject Index

Acupuncture therapy, for persistent hiccups, 323(3):166–168
Adolescents
caring for adolescent family members of physician colleagues, 323(1):49–53
hypertension in adolescent boy, 323(4): 227–230
Adult Protective Services, how geriatricians identify elder abuse and neglect, 323(1):34–38
Adverse drug effects
bullous skin disease: unusual allergic reaction to vancomycin, 323(5):273–278
contrast induced nephropathy after angiography, 323(5):252–258
African Americans
diabetic renal disease in, 323(2):78–84
end-stage renal disease survival in blacks and whites, 323(2):100–101
epidemiology of end-stage renal disease in, 323(2):65–71
focal segmental glomerulosclerosis in, 323(2):90–93
glucose tolerance and cardiovascular risk in young adult African Americans, 323(5):231–237
lupus nephritis in, 323(2):85–89
parathyroid hormone suppression by intravenous calcitriol: role of phosphate, calcium, race and diabetes, 323(4):210–215
pathophysiology of chronic progressive renal disease in patients with hypertension, 323(2):72–77
renal disease in: introduction, 323(2): 63–64
and renal transplantation, 323(2):94–99
Agnogenic myeloid metaplasia, clodronate in myelofibrosis, 323(2):115–116
Agroterrorism, unconventional biological threats and the molecular biological response to biological threats, 323(6):350–357
Alcoholism, Wernicke encephalopathy in nonalcoholic patients, 323(2):107–111
Allergy, bullous skin disease: unusual allergic reaction to vancomycin, 323(5):273–278
Angina pectoris, anomalous left coronary artery arising from right sinus of Valsalva in man with unstable angina pectoris and right coronary artery stenosis, 323(4):223–226
Angiography, contrast induced nephropathy after, 323(5):252–258
Angiotensin II antagonists
hypertension-lipid connection: relation between angiotensin II and cholesterol in atherogenesis, 323(1):17–24
improving managed care of hypertension with, 323(1):25–33
Animal studies, mouse models of atherosclerosis, 323(1):3–10
Ankle-brachial index, rational approach to diagnosis and treatment of intermittent claudication, 323(5): 244–251
Anthrax, bacterial pathogens as biological weapons and agents of bioterrorism, 323(6):299–315
Antihypertensive agents, improving managed care of hypertension with angiotensin II antagonists, 323(1): 25–33
Antimicrobial agents
bullous skin disease: unusual allergic reaction to vancomycin, 323(5):273–278
risk factors for methicillin-resistance among patients with *Staphylococcus aureus* bacteremia at time of hospital admission, 323(3):117–123
Antiretroviral therapy, HIV-associated renal disease in era of highly active antiretroviral therapy, 323(2):102–106
Antirheumatic agents
biological modifier therapy for treatment of rheumatoid arthritis, 323(4):197–205
Cox-2 inhibitors: today and tomorrow, 323(4):181–189
leflunomide for treatment of rheumatoid arthritis and autoimmunity, 323(4):190–193
mycophenolate mofetil: selective T cell inhibition, 323(4):194–196
new century of antirheumatic therapy, 323(4):169–170
pathogenesis of rheumatoid arthritis: guide to therapy, 323(4):171–180
Atherosclerosis
hypertension-lipid connection
introduction, 323(1):1–2
relation between angiotensin II and cholesterol in atherogenesis, 323(1): 17–24
mouse models of, 323(1):3–10
premature lower extremity atherosclerosis: clinical aspects, 323(1):11–16
Autoimmunity
leflunomide for treatment of rheumatoid arthritis and, 323(4):190–193
mycophenolate mofetil: selective T cell inhibition, 323(4):194–196

Bacteremia
relapsing group B streptococcal bacteremia in adult, 323(2):112–114
risk factors for methicillin-resistance among patients with *Staphylococcus aureus* bacteremia at time of hospital admission, 323(3):117–123
Bioterrorism
bacterial pathogens as biological weapons and agents of, 323(6):299–315
microbiological, biological, and chemical weapons of warfare and terrorism, 323(6):326–340
nuclear terrorism, 323(6):341–349
symposium introduction, 323(6):289–290
terrorism from public health perspective, 323(6):291–298
unconventional biological threats and the molecular biological response to biological threats, 323(6):350–357
viral agents as biological weapons and agents of, 323(6):316–325
Bisphosphonates, clodronate in myelofibrosis, 323(2):115–116
Botulism, microbiological, biological, and chemical weapons of warfare and terrorism, 323(6):326–340
Brain
primary central nervous system lymphoma masquerading as herpes encephalitis, 323(1):59–61
Salmonella meningitis in adults infected with HIV, 323(5):266–268
thoracic myelopathy complicating acute meningococcal meningitis: MRI findings, 323(5):263–265
Wernicke encephalopathy in nonalcoholic patients, 323(2):107–111
Brucellosis, bacterial pathogens as biological weapons and agents of bioterrorism, 323(6):299–315

Calcitriol, parathyroid hormone suppression by intravenous calcitriol: role of phosphate, calcium, race and diabetes, 323(4):210–215
Cancer
insulin: novel factor in carcinogenesis, 323(3):140–145
primary central nervous system lymphoma masquerading as herpes encephalitis, 323(1):59–61
tumor lysis syndrome after hydrocortisone treatment in metastatic melanoma, 323(3):155–157
Cardiology Grand Rounds, contrast induced nephropathy after angiography, 323(5):252–258
Cardiovascular health and disease
anomalous left coronary artery arising from right sinus of Valsalva in man with unstable angina pectoris and right coronary artery stenosis, 323(4):223–226
contrast induced nephropathy after angiography, 323(5):252–258
fatal acute myocardial infarction during severe thrombocytopenia in patient with idiopathic thrombocytopenic purpura, 323(5):279–280

glucose tolerance and cardiovascular risk in young adult African Americans, 323(5):231–237
hypertension in adolescent boy, 323(4): 227–230
hypertension-lipid connection
introduction, 323(1):1–2
relation between angiotensin II and cholesterol in atherogenesis, 323(1): 17–24
improving managed care of hypertension with angiotensin II antagonists, 323(1):25–33
mouse models of atherosclerosis, 323(1): 3–10
premature lower extremity atherosclerosis: clinical aspects, 323(1):11–16
Case Records of the VA Maryland Healthcare System/University of Maryland Medicine, 75-year-old man with right upper quadrant pain and gallstones, 323(3):146–150
Case Studies in Ethics from the G.V. "Sonny" Montgomery VA Medical Center and the University of Mississippi Medical Center, caring for adolescent family members of physician colleagues, 323(1): 49–53
Celecoxib, Cox-2 inhibitors: today and tomorrow, 323(4):181–189
Central nervous system lymphoma, masquerading as herpes encephalitis, 323(1):59–61
Chlorine, microbiological, biological, and chemical weapons of warfare and terrorism, 323(6):326–340
Cholesterol, hypertension-lipid connection: relation between angiotensin II and cholesterol in atherogenesis, 323(1):17–24
Cilostazol, rational approach to diagnosis and treatment of intermittent claudication, 323(5):244–251
Clodronate, in myelofibrosis, 323(2):115–116
Complementary and alternative medicine, acupuncture therapy for persistent hiccups, 323(3):166–168
Computed tomography, pulmonary artery thrombus and subcapsular liver hematoma in patient with HELLP syndrome, 323(3):151–154
Confidentiality, caring for adolescent family members of physician colleagues, 323(1):49–53
Coronary arteries, anomalous left coronary artery arising from right sinus of Valsalva in man with unstable angina pectoris and right coronary artery stenosis, 323(4):223–226
Corticosteroids, tumor lysis syndrome after hydrocortisone treatment in metastatic melanoma, 323(3):155–157
Cox-2 inhibitors, today and tomorrow, 323(4):181–189
Cushing disease, transient Graves disease developing after surgery for, 323(3):162–165
Cyanides, microbiological, biological, and chemical weapons of warfare and terrorism, 323(6):326–340
Cytokines
biological modifier therapy for treatment of rheumatoid arthritis, 323(4):197–205
pathogenesis of rheumatoid arthritis: guide to therapy, 323(4):171–180
Cytology, pleuritis as presenting manifestation of rheumatoid arthritis: diagnostic clues in pleural fluid cytology, 323(3):158–161

Diabetes mellitus
diabetic renal disease in African Americans, 323(2):78–84
epidemiology of end-stage renal disease in African Americans, 323(2):65–71
glucose tolerance and cardiovascular risk in young adult African Americans, 323(5):231–237
higher serum leptin level in women than in men with type 1 diabetes, 323(4): 206–209
parathyroid hormone suppression by intravenous calcitriol: role of phosphate, calcium, race and diabetes, 323(4):210–215
renal disease in African Americans: introduction, 323(2):63–64
Diagnosis
how geriatricians identify elder abuse and neglect, 323(1):34–38
pleuritis as presenting manifestation of rheumatoid arthritis: diagnostic clues in pleural fluid cytology, 323(3):158–161
primary central nervous system lymphoma masquerading as herpes encephalitis, 323(1):59–61
rational approach to diagnosis and treatment of intermittent claudication, 323(5):244–251
75-year-old man with right upper quadrant pain and gallstones, 323(3): 146–150

Echocardiography, acute pulmonary edema in emergency department: clinical and echocardiographic survey in aged population, 323(5):238–243
Emergency department, acute pulmonary edema in: clinical and echocardiographic survey in aged population, 323(5):238–243
Encephalitis
primary central nervous system lymphoma masquerading as herpes encephalitis, 323(1):59–61
viral agents as biological weapons and agents of bioterrorism, 323(6):316–325
Encephalopathy, Wernicke, in nonalcoholic patients, 323(2):107–111
Enterotoxins, microbiological, biological, and chemical weapons of warfare and terrorism, 323(6):326–340
Epidemiology
of end-stage renal disease in African Americans, 323(2):65–71
fulminant *Stenotrophomonas maltophilia* soft tissue infection in immunocompromised patients: outbreak transmitted via tap water, 323(5): 269–272
Etanercept, biological modifier therapy for treatment of rheumatoid arthritis, 323(4):197–205
Ethical issues, caring for adolescent family members of physician colleagues, 323(1):49–53
Etoricoxib, Cox-2 inhibitors: today and tomorrow, 323(4):181–189

Gallstones, 75-year-old man with right upper quadrant pain and, 323(3): 146–150
Gender differences, higher serum leptin level in women than in men with type 1 diabetes, 323(4):206–209
Geriatric patients
acute pulmonary edema in emergency department: clinical and echocardiographic survey in aged population, 323(5):238–243
how geriatricians identify elder abuse and neglect, 323(1):34–38
75-year-old man with right upper quadrant pain and gallstones, 323(3): 146–150
Gestational trophoblastic disease, hyperthyroidism in setting of, 323(5): 285–287
Glanders, bacterial pathogens as biological weapons and agents of bioterrorism, 323(6):299–315
Glomerulosclerosis, focal segmental, in African Americans, 323(2):90–93
Glucose tolerance, and cardiovascular risk in young adult African Americans, 323(5):231–237
Goodpasture syndrome, diffuse pulmonary hemorrhage, 323(3):130–139
Graves disease, transient, developing after surgery for Cushing disease, 323(3):162–165
Growth factors, origins of intracrine hormone action, 323(1):43–48

Hantaviruses, viral agents as biological weapons and agents of bioterrorism, 323(6):316–325
Hematology
fatal acute myocardial infarction during severe thrombocytopenia in patient with idiopathic thrombocytopenic purpura, 323(5):279–280
relapse of thrombotic thrombocytopenic purpura associated with decreased VWF cleaving activity, 323(5):281–284
Hematoma, pulmonary artery thrombus and subcapsular liver hematoma in patient with HELLP syndrome, 323(3):151–154
Hemorrhage, diffuse pulmonary, 323(3): 130–139

Hemorrhagic fevers, viral agents as biological weapons and agents of bioterrorism, 323(6):316–325
Herpes encephalitis, primary central nervous system lymphoma masquerading as, 323(1):59–61
Hiccups, persistent, acupuncture therapy for, 323(3):166–168
Histology, diffuse pulmonary hemorrhage, 323(3):130–139
Hormones
origins of intracrine hormone action, 323(1):43–48
transient Graves disease developing after surgery for Cushing disease, 323(3):162–165
Human immunodeficiency virus (HIV) infection
HIV-associated renal disease in era of highly active antiretroviral therapy, 323(2):102–106
Salmonella meningitis in adults with, 323(5):266–268
Hyperinsulinemia, insulin: novel factor in carcinogenesis, 323(3):140–145
Hypertension
in adolescent boy, 323(4):227–230
diabetic renal disease in African Americans, 323(2):78–84
epidemiology of end-stage renal disease in African Americans, 323(2):65–71
glucose tolerance and cardiovascular risk in young adult African Americans, 323(5):231–237
hypertension-lipid connection
introduction, 323(1):1–2
relation between angiotensin II and cholesterol in atherogenesis, 323(1):17–24
improving managed care of hypertension with angiotensin II antagonists, 323(1):25–33
pathophysiology of chronic progressive renal disease in African American patient with, 323(2):72–77
renal disease in African Americans: introduction, 323(2):63–64
Hyperthyroidism, in setting of gestational trophoblastic disease, 323(5):285–287
Hyponatremia, osmotic demyelination syndrome after correction of chronic hyponatremia with normal saline, 323(5):259–262

Idiopathic thrombocytopenic purpura, fatal acute myocardial infarction during severe thrombocytopenia in patient with, 323(5):279–280
Infection
bacterial pathogens as biological weapons and agents of bioterrorism, 323(6):299–315
fulminant *Stenotrophomonas maltophilia* soft tissue infection in immunocompromised patients, 323(5):269–272
microbiological, biological, and chemical weapons of warfare and terrorism, 323(6):326–340
relapsing group B streptococcal bacteremia in adult, 323(2):112–114
risk factors for methicillin-resistance among patients with *Staphylococcus aureus* bacteremia at time of hospital admission, 323(3):117–123
Salmonella meningitis in adults infected with HIV, 323(5):266–268
smallpox and the Native American, 323(4):216–222
symposium introduction: bioterrorism, 323(6):289–290
terrorism from public health perspective, 323(6):291–298
thoracic myelopathy complicating acute meningococcal meningitis: MRI findings, 323(5):263–265
tuberculosis of pancreas, 323(1):54–58
unconventional biological threats and the molecular biological response to biological threats, 323(6):350–357
viral agents as biological weapons and agents of bioterrorism, 323(6):316–325
Infliximab, biological modifier therapy for treatment of rheumatoid arthritis, 323(4):197–205
Influenza, unconventional biological threats and the molecular biological response to biological threats, 323(6):350–357
Insulin, novel factor in carcinogenesis, 323(3):140–145
Interleukin-1, biological modifier therapy for treatment of rheumatoid arthritis, 323(4):197–205
Intermittent claudication, rational approach to diagnosis and treatment of, 323(5):244–251
Intracrine hormone action, 323(1):43–48

Laboratory investigation, relationship between urine osmolality and specific gravity, 323(1):39–42
Leflunomide, for treatment of rheumatoid arthritis and autoimmunity, 323(4):190–193
Leptin, higher serum level in women than in men with type 1 diabetes, 323(4):206–209
Lewisite, microbiological, biological, and chemical weapons of warfare and terrorism, 323(6):326–340
Lipids and lipoproteins
hypertension-lipid connection
introduction, 323(1):1–2
relation between angiotensin II and cholesterol in atherogenesis, 323(1):17–24
mouse models of atherosclerosis, 323(1):3–10
Liver
pulmonary artery thrombus and subcapsular liver hematoma in patient with HELLP syndrome, 323(3):151–154
75-year-old man with right upper quadrant pain and gallstones, 323(3):146–150
Lower extremity atherosclerosis, premature: clinical aspects, 323(1):11–16
Lung function and disease
acute pulmonary edema in emergency department: clinical and echocardiographic survey in aged population, 323(5):238–243
diffuse pulmonary hemorrhage, 323(3):130–139
Lupus nephritis, in African Americans, 323(2):85–89
Lymphoma, primary central nervous system lymphoma masquerading as herpes encephalitis, 323(1):59–61

Magnetic resonance imaging (MRI)
primary central nervous system lymphoma masquerading as herpes encephalitis, 323(1):59–61
thoracic myelopathy complicating acute meningococcal meningitis: MRI findings, 323(5):263–265
Managed care, improving managed care of hypertension with angiotensin II antagonists, 323(1):25–33
Medical education, iterative method for learning skills as an efficient outpatient teacher, 323(3):124–129
Melanoma, metastatic, tumor lysis syndrome after hydrocortisone treatment in, 323(3):155–157
Melioidosis, bacterial pathogens as biological weapons and agents of bioterrorism, 323(6):299–315
Meningitis
Salmonella meningitis in adults infected with HIV, 323(5):266–268
thoracic myelopathy complicating acute meningococcal meningitis: MRI findings, 323(5):263–265
Methicillin resistance, risk factors among patients with *Staphylococcus aureus* bacteremia at time of hospital admission, 323(3):117–123
Minority health
African Americans and renal transplantation, 323(2):94–99
diabetic renal disease in African Americans, 323(2):78–84
end-stage renal disease survival in blacks and whites, 323(2):100–101
epidemiology of end-stage renal disease in African Americans, 323(2):65–71
focal segmental glomerulosclerosis in African Americans, 323(2):90–93
glucose tolerance and cardiovascular risk in young adult African Americans, 323(5):231–237
lupus nephritis in African Americans, 323(2):85–89
pathophysiology of chronic progressive renal disease in African American patient with hypertension, 323(2):72–77
renal disease in African Americans: introduction, 323(2):63–64
***Mycobacterium tuberculosis* infection,** of pancreas, 323(1):54–58
Mycophenolate mofetil, selective T cell inhibition, 323(4):194–196

Myelofibrosis, clodronate in, 323(2):115–116
Myocardial infarction, fatal, during severe thrombocytopenia in patient with idiopathic thrombocytopenic purpura, 323(5):279–280
Myocardial ischemia, anomalous left coronary artery arising from right sinus of Valsalva in man with unstable angina pectoris and right coronary artery stenosis, 323(4):223–226

Native Americans, smallpox and, 323(4):216–222
Neisseria meningitidis, thoracic myelopathy complicating acute meningococcal meningitis: MRI findings, 323(5):263–265
Nerve agents, microbiological, biological, and chemical weapons of warfare and terrorism, 323(6):326–340
Neurology
primary central nervous system lymphoma masquerading as herpes encephalitis, 323(1):59–61
Salmonella meningitis in adults infected with HIV, 323(5):266–268
thoracic myelopathy complicating acute meningococcal meningitis: MRI findings, 323(5):263–265
Wernicke encephalopathy in nonalcoholic patients, 323(2):107–111
Neutropenia, fulminant *Stenotrophomonas maltophilia* soft tissue infection in immunocompromised patients, 323(5):269–272
Nipah virus, viral agents as biological weapons and agents of bioterrorism, 323(6):316–325
Nitrogen dioxide, microbiological, biological, and chemical weapons of warfare and terrorism, 323(6):326–340
Normal saline, osmotic demyelination syndrome after correction of chronic hyponatremia with, 323(5):259–262
Nuclear terrorism, 323(6):341–349

Obesity, higher serum leptin level in women than in men with type 1 diabetes, 323(4):206–209
Osmotic demyelination syndrome, after correction of chronic hyponatremia with normal saline, 323(5):259–262

Pancreatic tuberculosis, 323(1):54–58
Parathyroid hormone, suppression by intravenous calcitriol: role of phosphate, calcium, race and diabetes, 323(4):210–215
Parecoxib, Cox-2 inhibitors: today and tomorrow, 323(4):181–189
Pediatric patients, caring for adolescent family members of physician colleagues, 323(1):49–53
Pentoxifylline, rational approach to diagnosis and treatment of intermittent claudication, 323(5):244–251
Peripheral vascular disease
premature lower extremity atherosclerosis: clinical aspects, 323(1):11–16
rational approach to diagnosis and treatment of intermittent claudication, 323(5):244–251
Phosgene, microbiological, biological, and chemical weapons of warfare and terrorism, 323(6):326–340
Plague, bacterial pathogens as biological weapons and agents of bioterrorism, 323(6):299–315
Pleuritis, as presenting manifestation of rheumatoid arthritis: diagnostic clues in pleural fluid cytology, 323(3):158–161
Pregnancy
hyperthyroidism in setting of gestational trophoblastic disease, 323(5):285–287
pulmonary artery thrombus and subcapsular liver hematoma in patient with HELLP syndrome, 323(3):151–154
Public health, terrorism from public health perspective, 323(6):291–298
Pulmonary edema, acute, in emergency department: clinical and echocardiographic survey in aged population, 323(5):238–243
Pulmonary hemorrhage, diffuse, 323(3):130–139

Q fever, bacterial pathogens as biological weapons and agents of bioterrorism, 323(6):299–315

Race/ethnicity
African Americans and renal transplantation, 323(2):94–99
diabetic renal disease in African Americans, 323(2):78–84
end-stage renal disease survival in blacks and whites, 323(2):100–101
epidemiology of end-stage renal disease in African Americans, 323(2):65–71
focal segmental glomerulosclerosis in African Americans, 323(2):90–93
glucose tolerance and cardiovascular risk in young adult African Americans, 323(5):231–237
lupus nephritis in African Americans, 323(2):85–89
parathyroid hormone suppression by intravenous calcitriol: role of phosphate, calcium, race and diabetes, 323(4):210–215
pathophysiology of chronic progressive renal disease in African American patient with hypertension, 323(2):72–77
renal disease in African Americans: introduction, 323(2):63–64
smallpox and the Native American, 323(4):216–222
Radiation sickness, nuclear terrorism, 323(6):341–349
Renal disease
in African Americans: introduction, 323(2):63–64
African Americans and renal transplantation, 323(2):94–99
contrast induced nephropathy after angiography, 323(5):252–258
diabetic renal disease in African Americans, 323(2):78–84
end-stage renal disease survival in blacks and whites, 323(2):100–101
epidemiology of end-stage renal disease in African Americans, 323(2):65–71
focal segmental glomerulosclerosis in African Americans, 323(2):90–93
HIV-associated renal disease in era of highly active antiretroviral therapy, 323(2):102–106
hypertension in adolescent boy, 323(4):227–230
lupus nephritis in African Americans, 323(2):85–89
parathyroid hormone suppression by intravenous calcitriol: role of phosphate, calcium, race and diabetes, 323(4):210–215
pathophysiology of chronic progressive renal disease in African American patient with hypertension, 323(2):72–77
Residents, iterative method for learning skills as an efficient outpatient teacher, 323(3):124–129
Rheumatoid arthritis
biological modifier therapy for treatment of, 323(4):197–205
Cox-2 inhibitors: today and tomorrow, 323(4):181–189
leflunomide for treatment of rheumatoid arthritis and autoimmunity, 323(4):190–193
mycophenolate mofetil: selective T cell inhibition, 323(4):194–196
new century of antirheumatic therapy, 323(4):169–170
pathogenesis: guide to therapy, 323(4):171–180
pleuritis as presenting manifestation of: diagnostic clues in pleural fluid cytology, 323(3):158–161
Risk factors
glucose tolerance and cardiovascular risk in young adult African Americans, 323(5):231–237
for methicillin-resistance among patients with *Staphylococcus aureus* bacteremia at time of hospital admission, 323(3):117–123
Rofecoxib, Cox-2 inhibitors: today and tomorrow, 323(4):181–189

Salmonella, meningitis in adults infected with HIV, 323(5):266–268
Singultus, acupuncture therapy for persistent hiccups, 323(3):166–168
Skin disease, bullous: unusual allergic reaction to vancomycin, 323(5):273–278
Smallpox
and the Native American, 323(4):216–222

viral agents as biological weapons and agents of bioterrorism, 323(6):316–325

Staphylococcus, risk factors for methicillin-resistance among patients with *Staphylococcus aureus* bacteremia at time of hospital admission, 323(3):117–123

Statin drugs, hypertension-lipid connection
introduction, 323(1):1–2
relation between angiotensin II and cholesterol in atherogenesis, 323(1):17–24

Stenotrophomonas maltophilia, fulminant soft tissue infection in immunocompromised patients, 323(5):269–272

Streptococcal infection, relapsing group B streptococcal bacteremia in adult, 323(2):112–114

Sulfur mustards, microbiological, biological, and chemical weapons of warfare and terrorism, 323(6):326–340

T cells
mycophenolate mofetil: selective T cell inhibition, 323(4):194–196
pathogenesis of rheumatoid arthritis: guide to therapy, 323(4):171–180

Teaching methods, iterative method for learning skills as an efficient outpatient teacher, 323(3):124–129

Thiamin deficiency, Wernicke encephalopathy in nonalcoholic patients, 323(2):107–111

Thoracic myelopathy, complicating acute meningococcal meningitis: MRI findings, 323(5):263–265

Thrombocytopenia
fatal acute myocardial infarction during severe thrombocytopenia in patient with idiopathic thrombocytopenic purpura, 323(5):279–280
relapse of thrombotic thrombocytopenic purpura associated with decreased VWF cleaving activity, 323(5):281–284

Thromboembolic disease, pulmonary artery thrombus and subcapsular liver hematoma in patient with HELLP syndrome, 323(3):151–154

Thyroid dysfunction
hyperthyroidism in setting of gestational trophoblastic disease, 323(5):285–287
transient Graves disease developing after surgery for Cushing disease, 323(3):162–165

Transplantation
African Americans and renal transplantation, 323(2):94–99
end-stage renal disease survival in blacks and whites, 323(2):100–101

Trauma, how geriatricians identify elder abuse and neglect, 323(1):34–38

Tuberculosis of pancreas, 323(1):54–58

Tularemia, bacterial pathogens as biological weapons and agents of bioterrorism, 323(6):299–315

Tumor lysis syndrome, after hydrocortisone treatment in metastatic melanoma, 323(3):155–157

Tumor necrosis factor α, biological modifier therapy for treatment of rheumatoid arthritis, 323(4):197–205

Urine osmolality and specific gravity, 323(1):39–42

Valdecoxib, Cox-2 inhibitors: today and tomorrow, 323(4):181–189

Vancomycin, bullous skin disease: unusual allergic reaction to, 323(5):273–278

Viral hemorrhagic fevers, viral agents as biological weapons and agents of bioterrorism, 323(6):316–325

von Willebrand factor (VWF), relapse of thrombotic thrombocytopenic purpura associated with decreased VWF cleaving activity, 323(5):281–284

Wernicke encephalopathy, in nonalcoholic patients, 323(2):107–111
